Dual Circuit Identification

Identify Critical Circuit Information

Uticom's reflective dual circuit identification system is a highly visible and expedient method of communicating critical circuit information in harsh environments.

The "slide-in" markers are manufactured according to the 3M™ Matched Component System™ (3M™ MCS™), which is the same silk screen printing process used to manufacture road signs. Once printed, the markers are laminated to virtually unbreakable polycarbonate.

These dual circuit markers are available in:

- ▲ Custom Sizes
- ▲ Custom Colors
- ▲ Kit Form
- ▲ Pre-Assembled
- ▲ Horizontal or Vertical Orientation
- ▲ Custom Banding and Hole Options
- ▲ .060" Aluminum Base

Slide-In Construction:

Stainless Steel Rivets
